

EDAA-TRUSTE JOINT PRESS RELEASE

New Research Shows Foundations for Growth of European Industry Initiative that Gives Consumers Transparency & Control over Advertising Choices

Awareness of the OBA Icon has Doubled in Britain and 1 in 25 European Consumers Have Visited the Your Online Choices website.

Brussels, 18 December, 2014 – A new online study commissioned by the [European Interactive Digital Advertising Alliance \(EDAA\)](#) and [TRUSTe](#), leading data privacy management company, has revealed that awareness of an icon aimed at providing greater transparency and control over behavioural advertising has doubled in Great Britain and, in just two years, the EU Self-Regulatory Programme underpinning this has achieved recognition and engagement.

The [European Advertising Consumer Research Index 2014](#) provides a comprehensive picture of attitudes and awareness of the EU Self-Regulatory Programme across Europe. The study was conducted by Ipsos MORI, on behalf of TRUSTe and the EDAA from 21 October – 10 November 2014 with over 10,000 respondents across 10 different European countries. The countries chosen — Great Britain, France, Germany, Spain, Portugal, Italy, Greece, Hungary, Poland and Sweden — were selected based on range of geographic spread and current implementation status of the EU Self-Regulatory Programme. An EDAA consumer awareness campaign took place in Greece in 2014 and one in Sweden had just commenced when the research was conducted. Comparison data is available for certain findings from Great Britain where TRUSTe commissioned comparable research carried out by Harris in 2012 and [2013](#).

The results show that awareness of the icon continues to rise in Great Britain with awareness increasing from 13% (2012) to 22% (2013) to 26% (2014) over the last two years and that the EDAA's 2014 consumer awareness campaign provided a significantly greater level of awareness in Greece, where 39% of respondents are familiar with the icon,

Among those who have seen the icon in Sweden and Greece, around 1 in 3 (both 32%) have chosen to find out more by clicking on the icon, with this figure rising to around half in Spain (49%). The Programme has been shown to have the potential for a positive effect on attitudes too, with 54% in Portugal more favourable towards the idea of online behavioural advertising if they have information about how adverts are delivered to them online and the option of managing their privacy preferences.

A summary of key findings include:

- Consumer awareness of the icon is highest in Greece (39%) where the most recent consumer awareness campaign took place

- Across four countries surveyed (GB, Greece, Portugal and Hungary) the recognition is significantly higher when the icon is accompanied by the Admarker text e.g. “AdChoices”
- Among those who have previously seen the icon, the proportion who report they have clicked on it is highest in Spain (49%)
- 1 in 25 respondents aged between 18-50 in the ten markets surveyed say that they have visited the <http://www.youronlinechoices.eu> website.
- Across the ten countries, the majority (57%) of 18-50 year olds who report they have visited www.youronlinechoices.eu correctly believe its primary purpose is to provide instructions to manage their advertising preferences.
- The Programme has the potential to improve consumer attitudes with 54% of respondents in Portugal saying that having the option of managing their privacy preferences and information about how adverts are delivered to them online would make them more favourable towards behavioural or interest-based ads.

“Consumer trust and understanding is essential to the digital advertising industry”, commented Nick Stringer, Chair of the EDAA and Director of Regulatory Affairs at IAB UK. “The findings of the 2014 European Advertising Consumer Research Index demonstrate how the EU industry initiative is helping to empower consumers with greater transparency and control over their online behavioural advertising preferences.”

“The results of this year’s European Advertising Consumer Research Index show foundations for growth of this important European self-regulatory initiative that gives transparency and control over advertising choices to European consumers and is achieving increasing recognition and momentum amongst the industry and regulators.” said Chris Babel, CEO, TRUSTe.

Copies of the research infographic are available [here](#).

About TRUSTe

TRUSTe is the leading global Data Privacy Management (DPM) company and powers trust in the data economy by enabling businesses to safely collect and use customer data across their customer, employee, and vendor channels. Our SaaS-based DPM Platform gives users control over all phases of data privacy management from conducting assessments and implementing compliance controls to managing ongoing monitoring. Our DPM Services, including assessments and certifications, are delivered by an expert team of privacy professionals. Thousands of companies worldwide rely on TRUSTe to minimise compliance risk and protect their brand. See <http://www.truste.com>

About the EDAA

The European Interactive Digital Advertising Alliance (EDAA) is a non-profit organisation based in Brussels and is responsible for enacting key aspects of the self-regulatory initiative for Online Behavioural Advertising (OBA) across Europe. EDAA principally acts as the central licensing body for the OBA Icon and

provides technical means for consumers to exercise transparency and control over OBA through the youronlinechoices.eu online consumer choice platform. EDAA is governed by EU-level organisations which make up the value chain of OBA within Europe and acts to ensure European consistency in approach. More information can be found at www.edaa.eu

Research Methodology

Research was conducted online by Ipsos MORI using an Omnibus methodology among a representative quota sample of c. 1,000 adults (of varying age groups) in each of the ten countries included. The following table contains details regarding sample size, age of respondents interviewed and dates of fieldwork:

Country	Sample	Fieldwork dates
Great Britain	1,007 adults aged 16-75	21 st – 23 rd October 2014
France	1,007 adults aged 16-75	21 st – 23 rd October 2014
Germany	1,008 adults aged 18-70	24 th – 28 th October 2014
Italy	1,006 adults aged 16-70	24 th – 28 th October 2014
Spain	1,006 adults aged 16-65	28 th – 31 st October 2014
Sweden	1,003 adults aged 16-65	28 th October – 10 th November 2014
Hungary	1,003 adults aged 16-60	28 th October – 3 rd November 2014
Poland	1,001 adults aged 16-60	28 th – 31 st October 2014
Portugal	1,000 adults aged 18-55	28 th October – 4 th November 2014
Greece	1,001 adults aged 18-50	28 th October – 5 th November 2014

Data were weighted to the known population profiles for each country. 125 adults questioned in Spain, 395 in Greece and 136 in Sweden reported that they have seen the icon.

Across the ten countries, there were 7,417 18-50 year olds interviewed, with 326 18-50 year olds reporting they have visited www.youronlinechoices.eu.

	Unweighted base	% who have seen the icon with Admarker text online	% who have seen the icon online
Great Britain	1,007	26%	20%
Greece	1,001	39%	24%
Portugal	1,000	24%	15%
Hungary	1,003	16%	11%

Comparison data is included from research conducted online by Harris Interactive on behalf of TRUSTe between 12-19 June 2013 among a total of 1,254 UK internet users, aged 18 and older from 31 May to 6 June 2012 among a total of 1,027 UK adults aged 18 and older. The online surveys were conducted using the Harris Interactive Online Consumer Panel.
